Assessment - 2

Section A – Basics (Short Answers)

1. What is SEO? Explain On-Page and Off-Page SEO.
Ans:

- **SEO (Search Engine Optimization)** is the process of improving a website's visibility on search engines like Google to increase organic traffic. It helps websites rank higher in search results for relevant keywords.
- **On-Page SEO** includes optimization done within the website such as title tags, meta descriptions, headings, keywords, and content.
- **Off-Page SEO** refers to activities outside the website like backlink building, social media promotion, guest blogging, and directory submissions that improve website authority and credibility.

2. Define keywords. What is the difference between short-tail & long-tail keywords?
Ans:

- Keywords are the words or phrases that users type into search engines to find information, products, or services. They help search engines understand the content of a webpage and match it with user queries.
- **Short-tail keywords** are broad search terms usually containing one or two words and have high competition.
- **Long-tail keywords** are more specific phrases with three or more words that usually have lower competition and better conversion rates.

3. What is Crawling, Indexing & Ranking?
Ans:

- **Crawling** is the automated process where search engine bots (like Googlebot or "spiders") systematically browse the web to discover new, updated, or existing content. These bots follow links from page to page to analyze content, code, and structure, feeding this data back to search engines for indexing and ranking.
- **Indexing** is the process where search engines like Google analyze, organize, and store web pages in a massive database (the index) after crawling them. It is a critical, mandatory step for visibility; if a page is not indexed, it cannot appear in search results.
- **Ranking** refers to a website's specific position on a Search Engine Results Page (SERP) for a particular query, with top spots (1–3) receiving the most organic, unpaid traffic. Search engines like Google use complex algorithms to determine these rankings based on relevance, user experience, and authority.

4. What is a SERP? Mention any 3 SERP features.
Ans: SERP stands for Search Engine Results Page, which is the page displayed by search engines after a user enters a search query. It shows a list of relevant websites, ads, and other information related to the search. SERP contains different features that enhance search results. Some common SERP features include Featured Snippets, People Also Ask, and the Local Pack (Google Maps results).

5. What is domain authority?
Ans: Domain Authority (DA) is a metric developed by SEO tools like Moz that predicts how well a website is likely to rank on search engine result pages. It is measured on a scale from 1 to 100, where a higher score indicates a stronger website. Domain authority is influenced by factors such as the quality and number of backlinks, website age, and overall SEO performance. Websites with higher DA usually have better chances of ranking higher on Google.

Section B – Practical Tasks

Select any one topic/business:
Travel Agency / Bakery / Mobile Store / Fitness Coach

I choose "Travel Agency"

Using **Ubbersuggest tool** to find find Primary & Long-tail Keywords its Search Volume & Keyword Difficulty

10 primary keywords
1. Travel agency
2. best travel agency
3. near travel office
4. online travel agency
5. tour operator
6. travel services
7. holiday packages
8. travel planner
9. tour packages
10. travel to guide

10 Long-tail keywords
1. best travel agency in india for international tours
2. cheap travel packages from india
3. how to start a travel agency in india

4. customized holiday packages india
5. best travel agency in india
6. travel agency for family vacation
7. best tour operator for europe trip
8. online travel agency for flight booking
9. travel agency for visa services
10. foreign tour packages in india

Search Volume & Keyword Difficulty for Primary Keywords			
No.	**Keywords**	**Search Volume**	**Keyword Difficulty**
1	Travel agency	60.5K	83 (High)
2	best travel agency	1.6K	76 (High)
3	near travel office	480	36 (Medium)
4	online travel agency	1.6K	84 (High)
5	tour operator	2.9K	79 (High)
6	travel services	1.6K	75 (High)
7	holiday packages	8.1K	76 (High)
8	travel planner	3.6K	32 (Low)
9	tour packages	27.1K	73 (High)
10	travel to guide	2.4K	17 (Low)

Search Volume & Keyword Difficulty for Long-Tail Keywords			
No.	**Keywords**	**Search Volume**	**Keyword Difficulty**
1	best travel agency in india for international tours	390	63 (Medium)

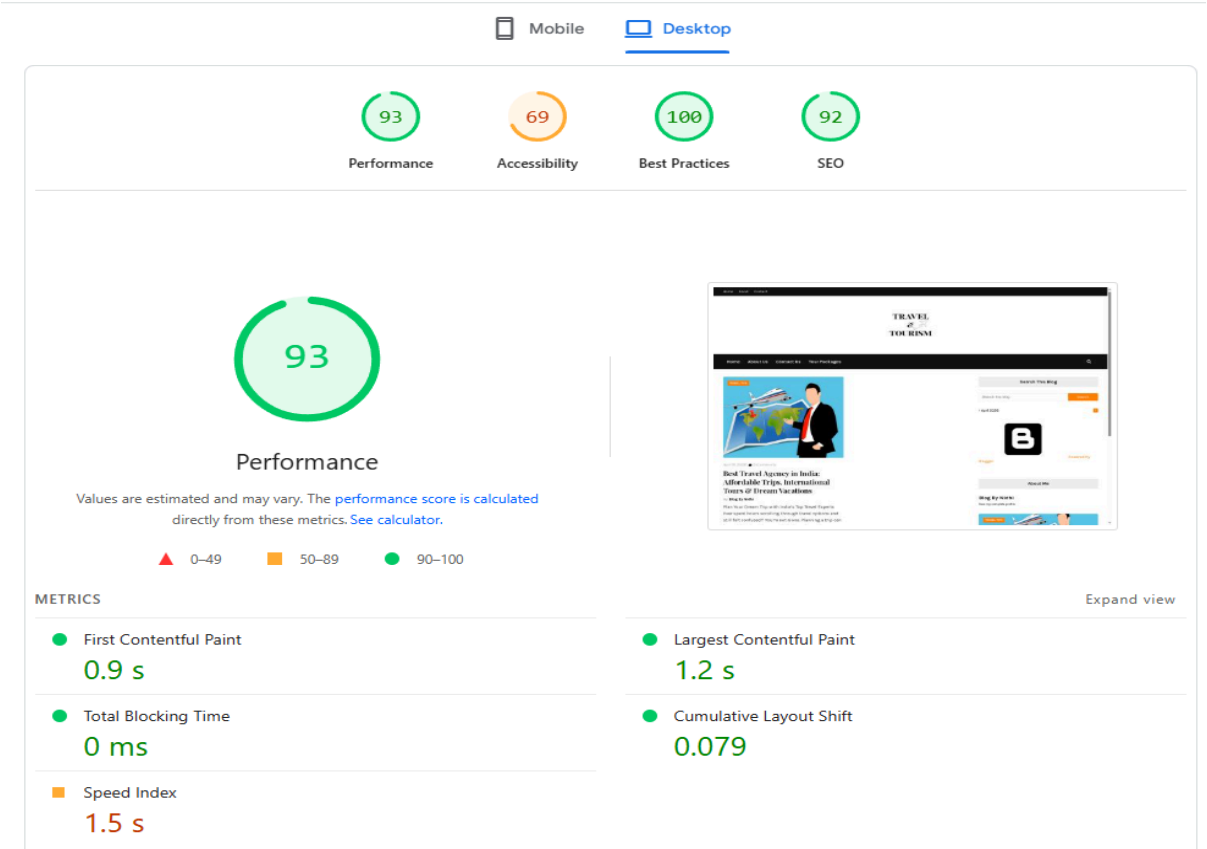
Task 2: On-Page SEO

Blog URL: https://best-travel-agency-india.blogspot.com/

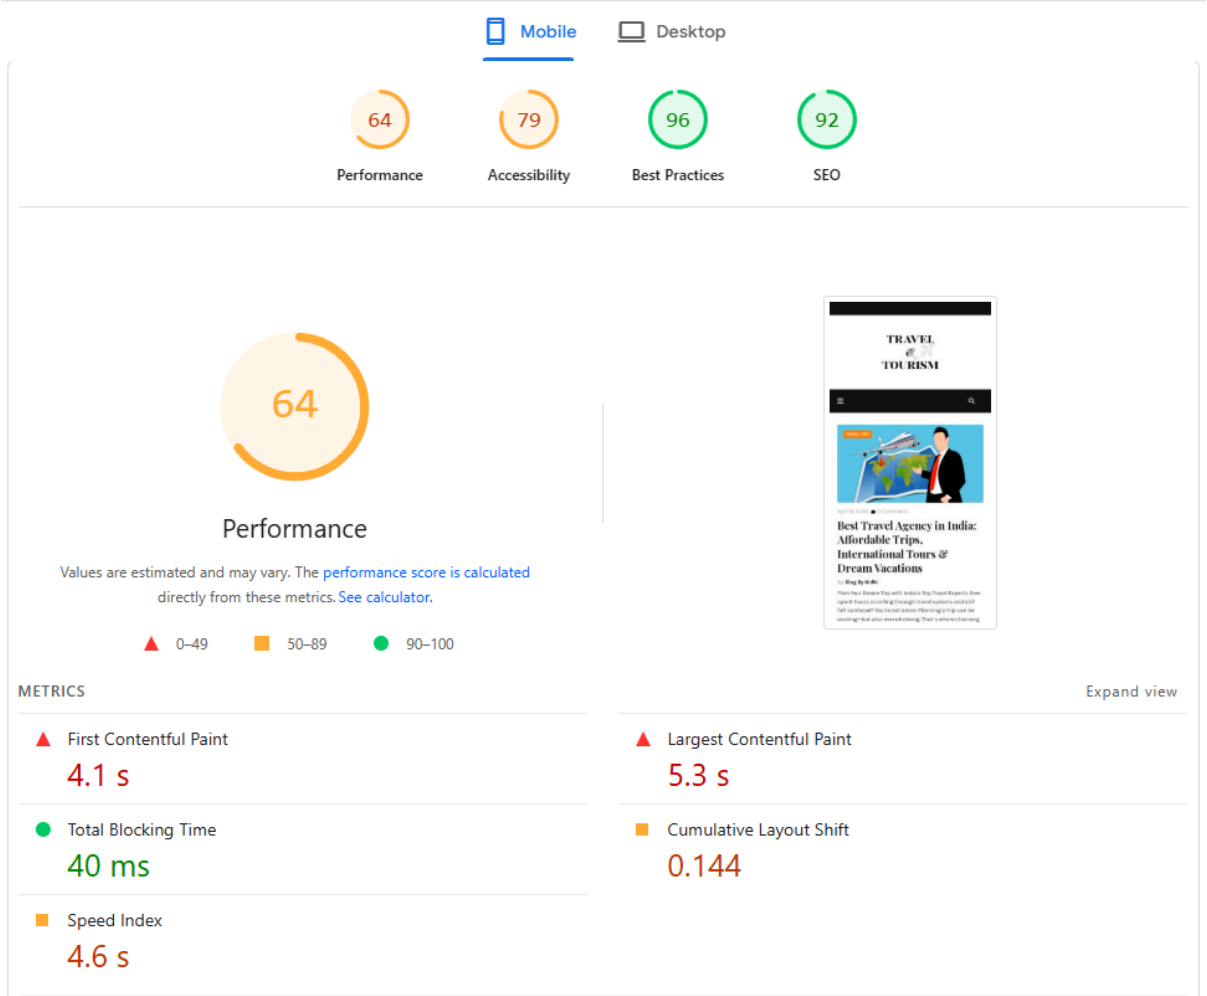
Task 3: Technical SEO Checklist

1. Page Speed Checked using Google PageSpeed Insights

For Desktop:

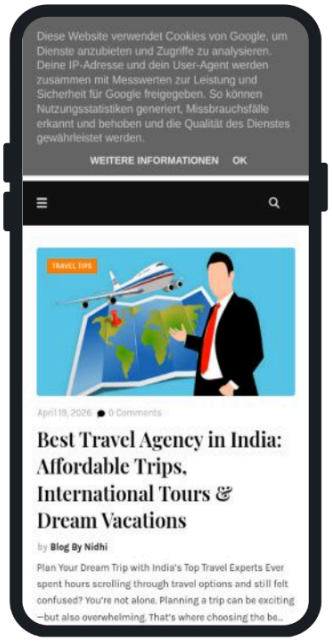


Page Speed for Mobile:



PageSpeed Insights:
https://pagespeed.web.dev/analysis/https-best-travel-agency-india-blogspot-com/8qz7442oqn?form_factor=desktop

2. Mobile Friendliness checked using https://smallseotools.com/mobile-friendly-test/ :



Your page needs improvements

71 Mobile performance score

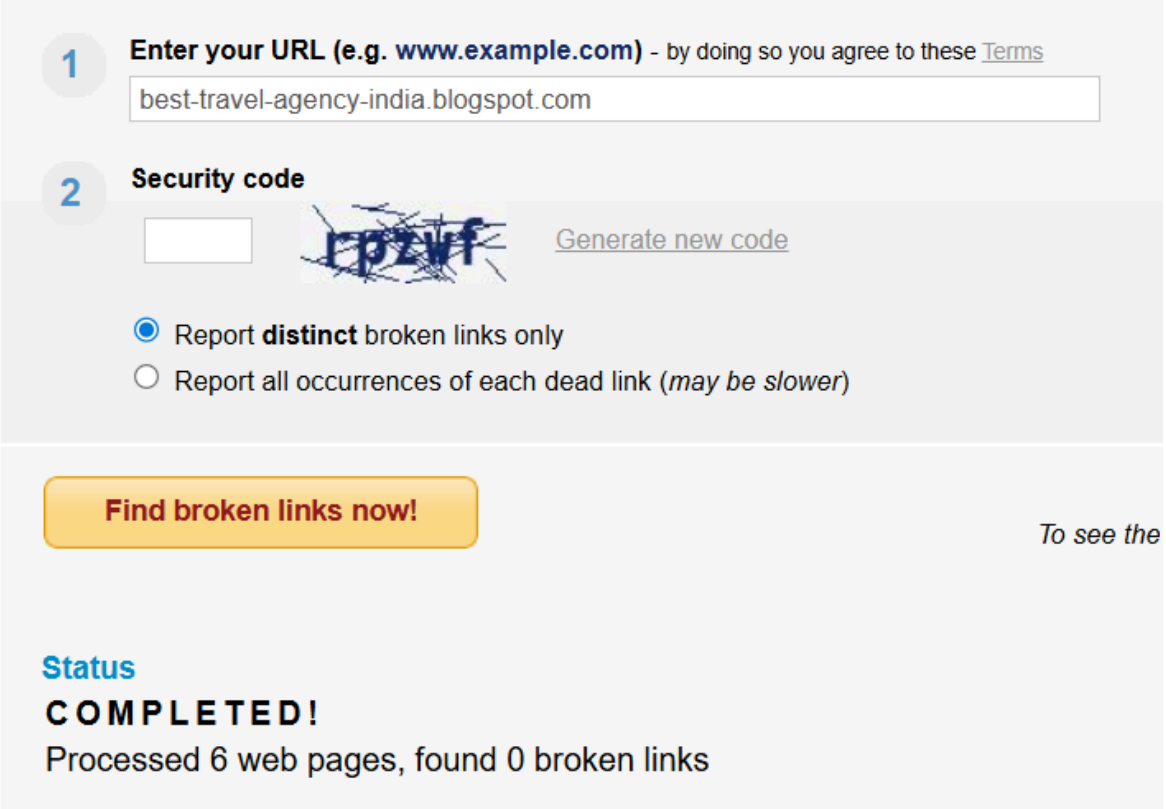
Other mobile-friendly test criteria:

- Tap targets are properly sized and well-spaced
- Text on the page is easy to read
- Content is wider than the screen/Content extends beyond the screen

Description	Recommendation
Checks if some page elements are wider than the device's screen, making the content difficult to view and interact with.	If the check is not passed, ensure all width attributes are relative (≤100%) or their pixel width doesn't exceed the screen width.

- Viewport is set correctly

3. Broken links checked using https://www.brokenlinkcheck.com/



No broken links found.

4. Sitemap Present - Yes
https://best-travel-agency-india.blogspot.com/sitemap.xml

5. Robots.txt - Present
https://best-travel-agency-india.blogspot.com/robots.txt

Section C – Mini Project

Seo Audit for my website:
https://best-travel-agency-india.blogspot.com/

1. Page Speed Performance

- Desktop performance is good, but mobile score is 71 (needs improvement)
- Indicates slower loading on mobile devices
- PageSpeed scores between 50–89 are “needs improvement”

2. Core Web Vitals (Performance Metrics)

- Some metrics like LCP (loading speed), CLS (layout stability), and FCP may not be fully optimized
- These directly affect user experience and rankings

3. Mobile Optimization

- Website is mobile-friendly but not fully optimized for speed
- Needs improvements for better mobile user experience

4. Meta Tags Optimization

- Meta title and meta description are properly added
- Helps improve search engine visibility

5. Heading Structure (H1, H2, H3)
Proper use of headings improves:

- Content readability
- SEO structure

6. Image Optimization
Alt text is added
However, images may still be:

- Heavy in size
- Not compressed

Large images slow down Largest Contentful Paint (LCP)

7. Internal Linking

- Internal links are present but can be improved
- More interlinking between pages can boost SEO

8. External Linking

- External links to trusted sites are added
- Improves credibility and SEO trust

9. Link Optimization Issue

- PageSpeed shows: “Links do not have descriptive text”
- Some links need better anchor text for SEO

10. Sitemap

- Sitemap is present and working
- Helps search engines index pages efficiently

11. Robots.txt

- Properly configured
- Allows crawling of important pages and blocks unnecessary ones

12. Content Quality

- Blog is informative and keyword-rich
- However, more content (blogs/pages) can improve SEO performance

Keyword Strategy Table:

Keyword	Type	Search Intent	Purpose
travel agency	Primary	Informational	General awareness about services
best travel agency	Primary	Commercial	Users comparing agencies
online travel agency	Primary	Transactional	Users ready to book online
tour packages	Primary	Transactional	Searching for travel deals
travel planner	Primary	Informational	Looking for planning help
best travel agency in india for international tours	Long-tail	Commercial	High intent for international trips
cheap travel packages from india	Long-tail	Transactional	Budget-focused users
customized holiday packages india	Long-tail	Commercial	Users wanting personalized trips
travel agency for family vacation	Long-tail	Transactional	Family trip planning
travel agency for visa services	Long-tail	Informational	Users needing visa help

5 Competitor URLs + Their Strengths

1. MakeMyTrip
URL: https://www.makemytrip.com/

Strengths:
- Strong SEO presence with high-ranking keywords
- Wide range of services (flights, hotels, packages)
- User-friendly interface and mobile app
- Strong brand trust in India

2. Yatra
URL: https://www.yatra.com/

Strengths:
- Attractive travel deals and discounts
- Good content and destination pages
- Easy booking process
- Strong presence in domestic travel

3. Cleartrip
URL: https://www.cleartrip.com/

Strengths:
- Clean and simple UI/UX
- Fast booking experience
- Good mobile optimization
- Reliable flight booking system

4. EaseMyTrip
URL: http://easemytrip.com/

Strengths:
- Competitive pricing (low-cost deals)
- No convenience fee (unique selling point)
- Strong SEO for budget travel keywords
- Fast-growing platform

5. Thomas Cook India
URL: https://www.thomascook.in/

Strengths:
- Trusted and established brand
- Strong international tour packages
- Offline + online presence
- High-quality travel services

Final SEO Recommendations

1. Improve Page Speed
- Optimize images (compress size)
- Reduce unused CSS/JavaScript
- Improve mobile performance (current score needs improvement)

2. Optimize for Mobile Users
- Ensure faster loading on mobile devices
- Improve responsive design and user experience

3. Enhance Keyword Usage
- Use primary and long-tail keywords naturally in content
- Add keywords in headings, URL, and meta tags

4. Improve Internal Linking
Link more pages like:
- About Us
- Contact Us
- Tour Packages

Helps users navigate and improves SEO

5. Fix Link Text Issues
- Replace non-descriptive links (e.g., “click here”)
- Use keyword-rich anchor text

6. Add More High-Quality Content

- Publish more blog posts regularly
- Cover topics like travel tips, destination guides, and packages

7. Optimize Images

- Use compressed images
- Add relevant alt text (already done, good 👍)

8. Build Backlinks

Get links from:

- Travel blogs
- Tourism websites
- Guest posting

Improves domain authority

9. Use Schema Markup

- Add structured data (schema)
- Helps search engines understand content better

10. Improve User Experience (UX)

- Make navigation simple
- Use clear headings and readable content
- Add call-to-action (CTA) like “Book Now”

11. Leverage Social Media

- Share blog posts on social platforms
- Drive traffic and increase visibility

12. Monitor Performance Regularly

- Use tools like Google Analytics and Google Search Console
- Track traffic, rankings, and errors
